Dear Redistribution Secretariat ,

It amazes me in this so-called democracy how each time there is a redistribution of electoral boundaries, that these redistributions 100% favour the Labor Party. 21 electorates at the past two redistributions nationally, and another 5 proposed this time including here in the ACT where the AEC just brazenly carbon-copied the plan of ACT Labor. Over 17% of federal parliament seats (> 14% needed to change government) now decided by far-left leaning bureaucrats in the totally lopsided and unrepresentative-of-Australia-generally APS before an election is even held.

It is arguable that the continual favouritism shown to the Labor party violates the Public Service Act 1999, it certainly fails the pub test. I look forward to your soon-to-be-announced 52-seat redistribution in favour of the LNP to demonstrate that a 26-seat favour does indeed go both ways and the AEC are not simply empty shells of the Fabian society undermining our democracy on our tax dollars.
