Objection to the proposed Warringah electorate boundary changes.

I wish to object to the proposed changes on the following points:

- The request for the boundary changes originated from an opposition political party that had recently lost in the seats effected. The proposed changes seem to be politically driven and not based on the requirements of the act.
- The existing geographical areas make sense in terms of the unique communities and specialist group interests. We are a community and this will be adversely affected by the proposed changes where common interests are impacted.
- The proposed changes will create unequal electorates and favour one above the others.
