NSW Federal Redistribution Objection

I refer to the proposed electoral redistribution to the seat of Warringah in NSW.

I advise the following comment and objections to the proposed redistribution;

1. I object to any elimination of the seat referred to as Warringah. I note the current proposal from the Commission is to change the boundaries of the seat but not to eliminate the seat. I generally support this position.
2. In relation to the proposed boundary changes for Warringah I advise I do not support the loss of the northern area of the current boundaries. I understand the need to even out the number of voters whilst reducing the number of seats in NSW and I support extending the boundaries of Warringah west in the manner suggested. I believe there is a need to preserve natural boundaries in electorates so extending Warringah to the Warringah Freeway is sensible.
