

Objection 286

Anonymous 17

1 page

I wish to object about the abolition of the seat of Higgins in the latest proposed restructure.

As a member of different community groups in Higgins, it would be a great shame to have this seat divided into different electorates, and not have a voice for Stonnington as one group.

It means that if there are any issues whereby a contribution or consultation is requested, that you may have to make contact with 5 different people to raise an issue or to support an endeavour.

There was some movement out of Stonnington during the Covid outbreak and the numbers to the Higgins electorate has continued to be restored, having had presentations from different people in the community.

This is an important issue for democracy, and I value being a citizen that can express an opinion.

I hope this objection is taken in the spirit in which it is intended, one of being positive and supporting this valuable electorate.
